

Penciltown

The solo resource management fantasy village building roll & write game by Andrew Backhouse.

You can buy the game on DrivethruRPG or through his website - <https://penciltown.org/>

Colour

White this game is meant for pencil, grid paper, dice and eraser - I wanted to make a digital version that you could play with a graphic editor (or various apps that move tiles around). Also so that if you want to record an actual play - it easier to do so and looks really nice.

So I've made a hires colour map for the first terrain example - the peaceful meadow. Just assume grid lines ever 100 pixels.

[Peaceful Meadow](#) Full size (5mb)
