

Miniature Trades and Sales

Companies I like

Harlequin, Crooked Dice, Northstar, Warlord, Eureka Miniatures, Westwind Productions

Scales I like

- 25-28mm for any genre
- 15mm for scifi (especially if Martian tripods and related)

Ranges and Franchises I collect

- Doctor Who
- Judge Dredd
- Aliens Vs Predator
- Other UK Scifi (Blake's 7, Prisoner etc) - anything that would fit the [7TV](#) rules from [Crooked Dice](#)
- non-military Steampunk and VSF / historic Victorian/Cowboy period including supernatural/League of Extraordinary Gentlemen anything that would fit [In Her Majesty's Name](#) or [Empire of the Dead](#). Gaspunk also. Only interested in fun characters or vehicles.
- Generic non-military scifi (ie civilians) ideally for roleplaying characters (from gonzo to gritty) primarily for [Five Parsecs From Home](#) so quasi Traveller or Star Trek are similar. Stargrave as well
- Generic non-military fantasy (ie civilians) ideally for roleplaying characters (ideally dark and gritty)

Values

- like for like whenever possible otherwise
 - painted is more valuable
 - metal is at least twice as valuable as plastic
 - resin, 3d print, bits, vehicles and unusual sizes are case by case
