Faction relations

Part of the creation process for the ship is used to establish initial relationships with factions in the game you have friend and enemies from the beginning. Here are yours:

Heat

Another ongoing stat that is kept track of is how noticeable you are to the authorities in each of the four systems. Once you max out the heat in a system (8), you get a wanted level (up to 4) and heat is reset. You can use downtime actions to reduce the heat you generate from completing missions
