

Magic

What is Magic?

Magic is the interface between energy and matter. It allows one to affect the other. Magic is entropy. In any reaction when conversion between matter and energy occurs and the results are not equal, the remainder is magical energy. It's also a key ingredient in sentients. Intelligent beings appear as small intricate knots of magic in the ebb and flow of the ley lines.

Where does it come from?

- [The Science of Magic and the Evolution of Gods](#) - the history of magic

How is it used?
